KINGSTON BLACK SINGLE ORCHARD RELEASE

One of the most renowned cider apples and one of our all-time favourites.

We love making single varietal cider from this apple as it never fails to deliver intense and strong expressions of the fruit.

This apple was cultivated to produce cider and has built a huge following and reputation globally with cider makers.

It is a tricky tree to nurture at times, but rewards the orchardist well once it is pressed into juice, providing a golden tangerine hue. A fresh and vibrant nose shows characters of apple blossom, sherbert and spice.

Spice transfers to the palate which balances acid, tannin and fruit sweetness perfectly to give weight and length. Rich, complex yet approachable.

Kingston Black is the perfect guest at the table.

Variety: Kingston Black

Origin: Taunton, UK

100% Tasmanian Apples

Kingston Black - a bittersharp heritage cider apple
